VIJAY KUMAR C.

Frontend Developer • UI/UX Designer • JavaScript & CSS Specialist

☎ xxxxx-xxx-xxx | ✉ xxxxxxxxxxxx@xxxxx.xxx | GitHub | LinkedIn

SKILLS SUMMARY

Languages: HTML5/CSS3, JavaScript, TypeScript, SQL, Java, Python
Frameworks: React, Angular, Tailwind, Sass, Bootstrap
Dev Tools: Git, Vite, VS Code, MySQL, Linux, Node.js, NetBeans, IntelliJ IDEA, Eclipse
Platforms: GitHub, WordPress
Soft Skills: Agile & Waterfall methodologies, SDLC, Leadership, Mentoring, Excellent communication, Stakeholder management, Problem-solving, Emotional intelligence, Critical thinking, Collaboration.

EXPERIENCE

Frontend Developer | *DRUM Studios – Farnham, UK* August 2023 – Present

- Improved page load and interaction responsiveness by 20-25% through code restructuring, optimised DOM manipulation, and reusable component structures.
- Delivered front-end features across 15+ Agile sprint cycles, maintaining alignment with sprint goals and release timelines.
- Built and maintained 30+ reusable UI components, reducing future development effort by 35-40%.
- Liaised with 6-10 stakeholders and UI/UX designers, participating in requirement analysis, development, testing and release phases as part of the full SDLC.
- Collaborated with QA during testing, code reviews, and UAT phases, contributing to a 15% reduction in UI-related defects.

PROJECTS

SecureKey (Password Generator) | ***Tech Stack:*** *React, TypeScript, Tailwind, Vite* April 2026

- Built a configurable password generator, supporting 6-100 characters with options to include lowercase, uppercase, numbers, and special characters.
- Implemented 4+ core UI features including password generation, length adjustment, character-set toggles, and reset/regenerate controls to enhance UX.
- Applied TypeScript to define typed props, React state, and component logic, improving code consistency by 30-40% and significantly reducing potential runtime errors.

ExpenseFlow (Expense Tracker) | ***Tech Stack:*** *React, Sass, Vite* March 2026

- Developed responsive expense tracking app with add, search, and delete transaction functionality across 5 expense and income categories.
- Implemented real-time financial analytics using React hooks, state management, conditional JSX rendering, and JavaScript array methods (e.g. filter, reduce) to track income, expenses, and balance.
- Built multi-field search and client-side validation for date, category, name, and amount; improving transaction filtering by 100% and reducing invalid form submissions.
- Created reusable SCSS-based styling architecture to separate UI from business logic and maintain a consistent UX across variant screen sizes.

DualTimer (Timer & Stopwatch) | ***Tech Stack:*** *Tailwind, Node.js, JavaScript, HTML, CSS* November 2025

- Designed and implemented dual stopwatch and countdown timer used across multiple device sizes.
- Applied object-oriented models to improve code maintainability by 40-50%.
- Improved UI responsiveness and accessibility, achieving consistent behaviour across 100% of tested viewports.

Calculator-UX (Arithmetic, Geometry, BMI) | ***Tech Stack:*** *Bootstrap, JavaScript, HTML, CSS* September 2025

- Developed multi-purpose calculator, handling 10+ calculation types including arithmetic, geometry, and BMI.
- Implemented modular JavaScript logic, reducing code duplication by 25-30%.
- Improved UX through real-time validation and UI feedback mechanisms.

EDUCATION

- BCS Tech10 Coding Diploma, *IT Online Learning* March 2025 – Present
- IT Level 3 Extended Diploma, *South Thames College* September 2019 – 2020
- IT Level 3 90-credit Diploma, *South Thames College* September 2018 – 2019
- ICT Level 2 First Extended Certificate, *South Thames College* September 2017 – 2018

LICENSES & CERTIFICATIONS

- **ITonlinelearning** – React Essentials (REA01) April 2026
- **Linkedin Learning** – TypeScript Essential Training April 2026
- **Linkedin Learning** – Sass Essential Training March 2026
- **ITonlinelearning** – JavaScript Essentials December 2025
- **ITonlinelearning** – Tailwind CSS v1.0 June 2025
- **ITonlinelearning** – CSS Essentials v1.0 May 2025
- **ITonlinelearning** – HTML and Web Essentials (HAW01) March 2025
